

## Public Health Emergency Policy

The purpose of this policy is to establish formal guidelines for operations during an extended epidemic or other emergency. The library should plan for numerous staff being unable to report for work during an epidemic or other health emergency. In addition, the library will be required to follow orders of the County and State Health Department to help slow the spread of illness. This may include the closing of all library branches, or other reductions in service. The library will attempt to keep core services of the library operational in case of reduced staff and reduced hours of operation.

### Levels of operation

**1. Business as usual.** During the period prior to the arrival of an epidemic or other health emergency, the library director shall monitor the situation and prepare stockpiles of supplies to reduce the likelihood of staff becoming infected and train staff on preventive measures to reduce the spread of infections.

The Library will follow CDC recommendations for everyday preventative actions to help prevent the spread of respiratory viruses, including:

- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Stay home when you are sick with a fever.
- Cover your cough or sneeze with your sleeve or a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using recommended cleaning spray or wipes.
- Books and other items returned will be wiped down with appropriate antiseptic wipes before being re-shelved.

**2. Notification of infections in the area.** When we have been notified by public health officials that the illness has arrived in our area the following precautions will be taken:

- Staff with compromising preconditions will be required to contact their healthcare provider for guidance on work attendance and/or protective procedures.

## Public Health Emergency Policy

- Staff will be encouraged to take protective measures, including the wearing of gloves, when working with patrons and returned items. Hand washing for 20 seconds with hot water and soap is required immediately after removing gloves.
- Programs involving groups of people will be canceled. This includes outside groups renting meeting rooms.
- Hours of operation may be reduced by the library director if illness lowers the number of staff able to work.
- Normal sick leave policy will be in force.

**3. Notification of health emergency.** Upon a declaration of a health emergency by public health officials, the library will first implement the directives of the public health officials. If the libraries are ordered closed the following procedures will take place:

- The public will be notified of the order to close by health officials via our standard procedures for closing.
- Staff will be notified of the closing by the current emergency method
- Assigned staff will empty the bookdrop once per day at each branch. Staff are required to wear gloves when handling returned materials. All materials returned will be disinfected as appropriate for the item. Staff are required to wash their hands for 20 seconds in hot water with soap after removing protective gloves. Branch managers will inspect the building for any maintenance problems that occur while being closed and inform the library director upon discovering any problems.
- All staff will continue to be paid for the duration of the emergency.
- Maintenance staff will be called in on an as-needed basis to fix problems occurring during the shut-down, if allowed by local officials.
- Overdues and bills for physical items will be suspended for the duration of the closing.

**4. Re-opening.** Staff will be notified by the current emergency method when the library is allowed to reopen. Provisions under step 2 may be required until the full epidemic has passed. The library director will make the appropriate determinations upon being allowed to reopen. The library director will continue to monitor news and public official announcements in case a second wave of illness occurs.
